

Attic Loft Ladder - 2700mm to 3050mm

RRP: \$1,334.95

The Attic Ladder is a solution for independent construction contractors as well as do-it-yourself homeowners. Open up an entire new space in the home for storage, whether it's above the ceiling of one-story or two-story homes.

The roof ladder is made from Pine, and comes complete with a smooth finish door. Expert craftsmanship means the ladder is exceptionally well-made for looks, durability, and safety. Dovetail joints have been used to fit the ladder treads and stiles for maximum stability. Each step of the ladder is serrated to provide anti-slip treads, and a safety lock with metal rod comes standard. Also included is a steel hand rail, again ensuring the safety of the user.

The Attic Ladder is appropriate for both traditional ceiling joists as well as trusses. The hatch door includes a seal to help prevent dust and wind drafts, and tension is spring-based and fully adjustable. Additionally, several smart features have been added to make installation as easy as possible. Complete, easy-to-follow instructions are included.

This particular model is intended for ceiling heights ranging from 2700 to 3050 mms.
