

Automatic Water Bowl

RRP: \$159.95

Your animals will never be without a source of clean, fresh drinking water with our automatic stainless steel feeder/water trough!

This automatic drinking bowl and water feeder is constructed from stainless steel 304 and features one float

Provide a continuous and reliable source of fresh water for your animals with our automatic stainless steel water trough. This drinking bowl comes equipped with a plastic float mechanism.

The automatic drinking bowl/water feeder is of the highest quality. It is constructed of corrosion-resistant stainless steel. The operation of the drinking bowl requires little attention as it constantly and automatically refills to float level. You can control the amount of the water in the feeder by adjusting the float mechanism to meet your needs.

Your animals will benefit from the constant source of fresh water and leave you free to attend to other tasks. The design of the water bowl slopes back to front which allows easy access for animals. The sloping design also allows for effortless cleaning and maintenance.

The water bowls is wall mountable and has a hinged cover to protect the float mechanism.

Take the worry and work out of providing your animals with fresh water. Order our automatic stainless steel water trough today!
