

Wall Mounted Pull Up Bar

RRP: \$294.95

Made from rugged 11-gauge steel, just like a full-scale pull-up system, this compact unit by Randy and Travis Machinery is optimized for ceiling and wall mounts. Once installed on concrete or timber studs, the pull-up bar will stand 30 inches from the ceiling or wall.

Specifications:

- Material: 11-gauge, 1" x 2" steel
- Depth: 30" from the wall or ceiling
- Width: Use studs 16 inches apart or a custom width up to 48 inches between the brackets
- Orientation: Horizontal or vertical. The support arm will stabilise the pull-up system
- Mounting hardware: NOT included
- Height: 7' 6" to 8' at the centre of the bar, but this is adjustable, depending on the height of the ceiling or intended athlete
- Distance between brackets (Concrete): 36"
- Distance between brackets (Timber studs): 32" or 48"
- Colour: Black
- Shipping weight: 37 lbs
- Length: 32"
- Height: 31"
- Total weight capacity: 500+ lbs
