

Automatic Dual Watch Winder Wood Display Box Case Motor Rotation Storage

RRP: \$229.95

For the watch lover, nothing is so dear as displaying his or her collection in an elegant box. This wooden display case from Randy & Travis Machinery not only stores watches, but it also winds them—keeping them in good shape even during storage. Capable of winding up to two watches at a time, it can wind in two directions—counter-clockwise and clockwise. With two rotation modes, it can change to accommodate your watch's precise needs.

With a noiseless motor designed in Japan, you won't even notice when it's winding your watch. An adjustable, soft pillow is suitable for a range of sizes, while its velvety-soft interior cushions your watches to avoid scratches. Its high-gloss ebony grain finish on wood gives it the ultimate in elegance even as it works to maintain the accuracy of your watch's turn per day (TPD) and rotating position.

Features and specifications:
