

## 18x 16mm 5kg Countersunk Pot Magnet | Rare Earth Latch Door Drawer Cabinet

RRP: \$49.95

If you need strong magnets to keep cabinet doors closed, these hefty A16 5-kilogramme countersunk pot magnets are up to the task.

Crafted from the rare-earth element neodymium, these magnets from Randy & Travis Machinery are sunk into a steel pot, with a centred borehole and countersink. Screw them into the ceiling or wall, and you can even use them to attach objects to these surfaces, using a countersunk screw.

Use them to create structural solutions in industries such as lighting, booth or plant construction, and metalworking. They work equally well as a cup, mounting, or holding magnet.

### Features and specifications:

- Quantity: 18 magnets
- Specifications
- Material: Neodymium
- Weight 278g
- Pulling Force: 112 kg
- Colour: silver
