

Hinged Knee Brace Support ~ ACL MCL ligament Runner's Knee

RRP: \$44.95

If you run or train in another knee-pounding sport, you need to know about Randy & Travis Machinery's world-class hinged wraparound knee brace. For ACL, MCL, runner's knee, or other knee issues, this support will keep your knee stable as you train, while the hinge increases mobility. A patella buttress helps to stabilise and protect the kneecap from subluxation, as well as keeping the inflammation from an irritated kneecap, a cartilage injury, or arthritis.

This brace applies gentle pressure to your patella tendon, relieving pain and keeping your kneecap stable.

Features and specifications:

- Size: Large (measured around the centre of the knee) 40-50 cm
- Gender: Any
- Colour: Black
- Side: Both left and right
- Fabric: Breathable mesh
- Features: Triaxial hinge, patella buttress, antimicrobial treatment for odours
- Design: Open back to avoid bunching
- Straps: Adjustable for custom fit and controlled compression

TGA ARTG Registration: 355031
