

8 x 2" Polyurethane Castor Wheels - Swivel and 4 with brake

RRP: \$79.95

Looking for castor wheels that can handle even the heaviest loads? These heavy-duty two-inch polyurethane castor wheels from Randy & Travis Machinery can hold up under even the toughest use. A set of eight swivel-capable wheels, four of them with an inbuilt brake, serve a wide range of uses, from making your office furniture more mobile to making it easier to move your heavy home workbench, even if you're on the petite side.

Each castor can bear a load of 100 kilograms, making a set of four capable of handling large equipment. Screw them onto the legs of your heaviest pieces to make it easy to rearrange your furniture or move pieces from room to room. A wide plate helps to spread the load across the castor to better balance the load. Precision double ball bearings on each wheel make movement easy. The swivel top, too, has a ball bearing for ease of use.

If you've been frustrated with bulky furniture that make it hard to move around, try this set of heavy-duty castor wheels today.
