

20L Deluxe Mop Wringer Bucket Side Press Janitor Commercial Cleaning

RRP: \$154.95

If you need a sturdy mop bucket to clean your place of business or your home, try this fine commercial-quality cleaning mop bucket with a built-in wringer from Randy & Travis Machinery. Holding 20 litres, this mini-bucket is easy to manoeuvre around the areas you need to clean.

Unlike a regular cleaning bucket, this mop bucket has four caster wheels, making it easy to move from place to place. Instead of carrying it to a drain, you can just roll it, making water changes a breeze. And, as all cleaning professionals will tell you—cleaner water makes for cleaner floors and walls.

Its ergonomically designed handle, too, prevents user fatigue, making this an ideal tool for repetitive tasks, such as cleaning large areas or frequent cleanings in public spaces.

Perfect for cleaning professionals or home users, this commercial-grade janitorial cleaning tool allows you to get surfaces sparkling clean. The bucket's down-press wringer removes excess water, giving you fewer streaks.

The handy built-in wringer even makes cleaning up afterwards a snap since you never have to touch the mop head. Just rinse it out, use the wringer to squeeze out all the water, and you're done. Storage, too, is easy with its compact size. Only 18 inches long and 11 inches wide, it will fit handily into any cleaning closet. Get yours today—and get a jump on your fall cleaning!
