

6-50 mm² Wire Crimper Cable Crimp Electric Tube Crimping Hand Tool Battery Lug

RRP: \$84.95

If you work with electrical connections, a cable crimping tool is an essential ingredient in your toolbox. This quality six- through 50-millimetre wire crimper from Randy & Travis Machinery will provide years of dependable service and an accurate bore diameter that will never let you down.

Crafted from SCM-40 ultra-hard steel, this tool is built to last—even under rugged conditions. It's easy to change heads with its 360-degree rotation.

With lower pressure requirements to operate, you can change heads easily even when you have little hand strength. Just press to rotate the inner dies—it's a snap.

With six crimping sizes, you'll be able to work with wires of varying sizes, including 6 mm² = 10 AWG, 10 mm² = 8 AWG, 16 mm² = 6 AWG, 25 mm² = 4 AWG, 35 mm² = 2 AWG, and 50 mm² = 0 AWG.

Its high accuracy gives you the power to calibrate with ease, while its ergonomic design reduces fatigue. A built-in carrying handle makes it easy to tote it to every job, while the anti-slip handle material assures you of the highest safety standard.

Perfect for a gift for the electrician or handyman, this tool is a practical gift your recipient will never want to be without on the job. Buy one for yourself or your special someone today.
