

10 Pack Solar Torch Lights 96 LED Flickering Lighting Dancing Flame Garden Lamp

RRP: \$399.95

Get ready for spring and summer with these gorgeous solar pathway lights from Randy & Travis Machinery. Although their warm light flickers just like real flames, they're actually LED lights powered by the sun itself. Create an intimate atmosphere on your patio or scatter them throughout your garden to create a nocturnal wonderland.

Since these lights use a rechargeable battery and solar power, you won't have to tear up your lawn or garden to wire them underground. They're IP65 waterproof, so they resist wind, rain, and snow. The solar panels are durable, with an average life expectancy of over five years.

In the summer, you can expect about 10 hours of light on a fully charged battery, while in the winter, they usually provide five hours of light. With only about eight to ten hours of sun exposure required for a full charge, they should achieve a full charge on most days. A sensor inside switches them on at dusk and off with the sun's first rays of light. Put the charm of dancing flames to work for you without the danger of real fire. Buy your ten-light set today.

Features and specifications:

- Material: ABS plastic
- Colour: Black with copper finish
- Quantity: 10
- Installed height: 60.96cm
- Bulb type: LED
- Light type: Warm yellow flickering flame
- Power: Solar
- Solar module: 0.88 W at 17% efficiency
- LED life span: 50,000 hours
- Brightness: 35 lm
- Charging time: 8 hours
- IP65 waterproof
- Automatic light detection sensor
- Accessories: 10 in-ground pegs, 10 3.7 V 2,200 mAh lithium-ion batteries
