

Commercial Grade Lock Wall Mounted Key Safe Storage Lock Box security

RRP: \$54.95

Never worry about leaving your keys inside your home or car ever again with this commercial-grade wall-mounted key safe from Randy & Travis Machinery. Install it on the wall by your garage, punch in a code, and voila! You have access to as many as five keys, all stored safely inside the lock. A customisable four-digit combination makes it nearly impossible for trespassers to guess your entry code. No worries about damage from harsh climate conditions. A shutter door keeps your keys safe from rain, wind, dust, and grime. Vinyl shackles protect the device from scratches.

Crafted from durable zinc metal, this locked safe allows you to enjoy convenient key storage for years to come. Its near-impenetrable construction resists hammers, saws, and other tools that thieves might use to break into your safe – and into your home. Since it only requires a four-digit code, it's a great choice for families who have children who come home from school before their parents arrive. Even older primary school kids can memorise the code. With an easy-grip combination dial, this safe is easy for both little hands to use.

It's easy to install on all surfaces, with a seamless design and contemporary metallic finish that will blend in well with your home's exterior design. Keep your home and family safe even while you're away for the summer holidays. Get yours today.
