

2pcs Speaker Stands Stand Rear Surround Sound Satellite Speakers Adjustable

RRP: \$104.95

Whether you're relaxing in your home theatre, playing video games in the family rumpus room, or at the office working with clients, surround sound is the perfect choice. With this set of speaker stands by Randy & Travis Machinery, music, games, and movies will come alive, making you feel as if you're right in the middle of the action. Crafted from powder-coated steel, these streamlined speakers will blend into the background of any room they're in. Their slim, contemporary profile looks good with a wide range of home or office décor, while their neutral black colour goes with a variety of colour schemes. A hollow tube cable management system hides the speaker cables for a tidy, elegant look.

Don't let their slender profile fool you, though. Underneath those slim lines lie premium-quality construction and a sturdy steel double base, providing stability and durability for years of use. Not only are they the ideal choice for mounting surround sound satellite speakers, but they also work equally well for a wide range of other small speakers, thanks to the stand heads' multiple mounting holes. They adjust to a variety of heights from 75 cm to 112 cm, allowing you to customise your sound experience. Easy to install, they're the perfect choice for both office and home. Order yours today!
