

12V Car Air Compressor 4x4 Tyre Deflator 4wd Inflator Portable 85L/min

RRP: \$164.95

It's your worst nightmare when you're travelling by car for pleasure or business: a flat tyre. If you're armed with this compact air compressor by Randy & Travis Machinery, you never have to worry about flat tyres again. In only 90 seconds, you can fill your tyre with air and be on your way to your destination. And, if you accidentally over-inflate, no worries. Simply use the deflation valve and return your tyre to the proper psi level.

Its working capacity of 150 PSI fills your tyre at a rate of 85 litres per minute. With its dual-cylinder power, it can easily accommodate tyres on even larger vehicles, such as 4x4s. A bleed valve protects the compressor by releasing the pressure built up inside the tank from air or other gases. Keep it in your car's boot for easy access when you travel. It comes with its own carry bag, so you can take it along with you wherever you go. Its top-quality construction ensures that it will last for years to come. Don't wait to protect you and your family from the hassle and danger of a flat tyre. Order your portable air compressor today!

Features and specifications:

- Material: Double-alloy steel (cylinder blocks), PU (hose), and chrome plating (connector)
- Colour: Black and yellow
- Dimensions: 24.5 x 9.5 x 19cm (L x W x H)
