

Laptop Cooling Fan 11-17" Notebook

RRP: \$84.95

One of the most annoying aspects of owning a laptop is its tendency to overheat. Nip overheating in the bud with this laptop cooling pad and stand from Randy & Travis Machinery. Accommodating laptops from 11 to 17 inches, the stand features six fans to circulate the air around your laptop to cool it down, even when you use it for hours on end. Three fan rotation settings allow you to customise your fan usage to your exact needs. With its anti-slip adjustable stand, you can place it at whatever angle feels most comfortable to you.

Even with the pad's sleek design, ample padding cushions your laptop from accidental bumps and dampens vibrations for ultra-silent usage. It's powered by a USB connection, and it folds for storage, making it easy to take anywhere you go. With its six fan speeds, you can set it at the perfect level for keeping your laptop cool for those marathon work-from-home sessions and Zoom meetings. Bright-blue LED lights add a futuristic touch, giving your workspace a high-tech look. A convenient control panel allows you to adjust the settings with only a touch. Give your laptop longer life by keeping it running cool. Order your pad and stand today!
