

Folding Pet Dog Car Boot Access Steps Ladder Stairs Strong Lightweight

RRP: \$159.95

If your dog struggles to get into your car, don't leave him or her behind when you travel. Senior dogs, as well as tiny breeds, especially have difficulty jumping up into your vehicle. Make it easier for your pups with this set of folding steps from Randy & Travis Machinery. No more strain on your back or your dogs' joints. Just an easy climb up the stairs into your car. Folded, they're compact and easy to store at home, in the garage, or stowed away in the boot of your car. They even come with a handle, making them easy to carry along when travelling.

Since cars and other vehicles don't come in standard heights, you can adjust these steps for vehicles of any height. Designed for safety, these steps come with a safety tether that attaches to your boot latch with a carabiner clip. That's not all. The supporting structure for these steps has anti-skid rubber feet, and each step features anti-slip. These steps don't just protect your pets, though. These steps work well with dogs of a broad range of sizes, from toy breeds to extra-large dogs up to 100 pounds. Before your next trip, do your dog a favour and order these steps today!
