

## 100 Composite Decking Hidden Fixing Fasteners Plastic T Clips & Screws

RRP: \$59.95

If you're building or remodelling a composite deck for summer fun, you'll want a set of T-clip fittings that are as tough as your deck itself. This set of 100 composite decking clips and screws by Randy & Travis Machinery is the perfect solution. Specially designed for composite decking boards, these clips and screws will hold up even under heavy use. After all, that's what decks are for — relaxation and play.

Featuring a hidden board-fastening system, these fittings will retreat from sight once your deck is up. And, they fit between the boards, attaching directly to the composite decking joists. All the work happens unseen, giving your deck a smooth, seamless look. As tough and rugged as they come, these T-clip fixings will withstand anything nature can dish out. They're frost-proof, weatherproof, and designed to last as long as your deck does. Additionally, they're reusable, so when your deck is ready for demolition, you can use them again in your new construction. If a new deck is in your future, you need these hard-working clips. Get yours today!
