

Badminton Robot Automatic Launcher Ball Machine

RRP: \$384.95

Spinning the shuttlecock while playing badminton is an overwhelming task for both amateurs and professional players. But how about you get an automatic badminton machine from Randy & Travis Machinery for ball pitching? It will make the game a lot smoother and more fun.

This product is specially manufactured with a built-in, fixed-point serve contact machine and is recommended for single players. Since the machine can be rotated left or right, the shuttlecocks can be pitched at any angle. All you need to do is assemble the parts and get on the bandwagon.

This Automatic badminton Machine paves the way for practising badminton in a user-friendly manner. You no longer have to struggle to align your shuttlecock at the perfect angle; this also reduces the pressure on your arm and can help you build your stamina. Moreover, it can be used indoors or outdoors. The best part is the portability; you can carry this product at school, parks, etc. If you have teenage children at home, this product is a great starting point for them to master this game and enhance their motor skills.

Features & Specifications:

- Includes 6 pcs shuttlecocks
- Material: PVC (polyvinyl chloride)
- Lightweight & portable
