

## Dish Drying Rack Drainer Cup Plate Holder Cutlery Tray Kitchen Organiser

RRP: \$129.95

Offering a convenient, hygienic alternative to dish drying using a tea towel, the Randy & Travis Machinery dish drainer rack provides draining board storage for washed crockery, cutlery and utensils. This two-tier drying rack has specific spaces for cutlery and chopping boards, ensuring secure, stable storage. With space for up to eighteen bowls and ten plates, in addition to other items, this drainer is ideal for the demands of a family kitchen. The compartments have drainage holes that allow water to drop down onto the drip tray under the rack. This is shaped so that the excess water drips back into the sink, preventing unwanted build-up.

The stainless steel/plastic construction results in a durable product that's resistant to water damage. Built to last, the drainer can be used for temporary dish storage or as a permanent home for crockery in a kitchen where cupboard space is limited.

### Features:

- Spacious, two-tier drainer with a 30kg weight limit
- A hygienic drying solution for crockery and cutlery
- Separate compartments for chopping boards and cutlery
- Straightforward assembly with no need for specialist tools
