

## 1:58 Torque Multiplier Set Wrench Lug Nut Labour Saving Lugnuts 4 Sockets

RRP: \$169.95

Introducing The Randy & Travis Machinery high-quality Torque Multiplier Set 1:58, a professional tool kit designed for effortless removal of tough lug nuts. This set includes a durable alloy steel wrench with a 1:58 gear ratio, delivering a maximum torque output of 4800 N/M.

Crafted from extra solid alloy steel, our torque wrench is highly resistant to abrasion and wear, ensuring long-lasting performance. The handle is wrapped with rubber foam, providing a comfortable grip and making it easy to turn bolts and remove lug nuts with minimal effort.

The set includes four 1-inch deep impact drive sockets (21 mm, 33 mm, 38 mm, and 41 mm), offering versatility for various applications. The compact and portable design, along with the convenient plastic storage case, allows for easy transportation and organization.

This torque multiplier set is ideal for removing and installing wheel lug nuts, making it a valuable tool for trucks, RVs, and other heavy-duty vehicles. Whether you're working on cars or construction projects, our torque multiplier set saves time and labour, making it an essential addition to your toolkit.

### Specifications:

- Material: Alloy Steel
- Trans-Speed Ratio: 1:58
- Max Torque Output: 4800 N/M (Approx. 3540 ft/lb)
- Socket Drive: 1"
- Rocking Bar Length: 10.6" (27 cm)
- Sockets: 21 mm (0.825"), 33 mm (1-5/32"), 38 mm (1-1/2"), 41 mm (1-5/8")

### Package Content:
