Polycarbonate Roof Window

For do-it-yourself enthusiasts or professional contractors, installing a polycarbonate roof window can make a dramatic difference in any room of the home, flooding the space with beautiful and natural light. We're proud to offer a complete roof window kit with our Polycarbonate Roof Window.

The roof window measures 500mm wide by 800mm long. It is 4mm thick, and features 98% polycarbonate construction of the glass pane. This material is specifically designed to block harmful ultraviolet sun rays. For all-weather durability that will last for many years, the roof window is framed with a stainless steel body. Materials for leakproof window flashing and all necessary accessories are included with this kit. The roof window and frame are designed to match both tile roofing and roofing made from corrugated galvanised iron (CGI).

Transform a room and let the light shine in. Purchase the Polycarbonate Roof Window today.

Features of the Polycarbonate Roof Window:

- *Dimensions of 500 x 800 mm (W x L)
- *4mm thickness
- *Pane constructed of 98% polycarbonate with anti-UV properties
- *Weatherproof stainless steel body
- *Window flashing and other accessories are included
- *Appropriate for both tile and CGI roofing
