

15-37" Plasma LED LCD Screen TV Mount with 180 Degree Swivel

RRP: \$89.95

The handy Plasma/LED/LCD Screen Mount with 180 Degree Swivel will free your viewing options in the living room, bedroom, game room, office and more. It's great for both flatscreen televisions and computer monitors.

This sturdy mount is built to VESA standards with fittings for 50mm, 75mm, 100mm and 200mm. It will fit the majority of televisions and monitors from 15 to 37 inches (38 to 94cm) with a maximum loading weight of 30kg (66lbs).

The mount has a vertical tilting mechanism which tilts both downwards and upwards, 15 degrees in either direction. This is great for both customising your viewing experience (including reducing unwanted glare) or enjoying easier access for hooking cables up.

An additional special feature you will enjoy is a full 180 degrees swivel arm. Whether it's at the office, at home entertaining guests, or simply enjoying movie watching by yourself or with family, you've never had more viewing options.

A FREE 3m HDMI cable (1.4 version) is included with your purchase to get you viewing right away. Also included is a free bubble level to help with installation. All screws and bolts you need (that will fit the majority of screens) are also included along with full, easy-to-follow mounting instructions.

Add ultimate flexibility and space-saving convenience to your home or office with the Plasma/LED/LCD Screen Mount with 180 Degree Swivel.
