

Gravity Inversion Boots Therapy Hang Spine Posture Physio Gym Fitness

RRP: \$164.95

Increase your overall strength and flexibility while you decrease your stress and strain!

Take a break while you strengthen your body! That may sound like a contradiction but when you use a pair of our Gravity/Inversion Boots you'll learn the wisdom of that claim.

It's common to suffer aches and pains during athletic workouts. Pulled muscles and over-stressed tendons can be caused by aerobic and step training, jogging and general weight training. Using our gravity boots will help accelerate recovery time from compression fatigue, back pain and spasms associated with general work out routines.

You'll be amazed at the instant relief these boots bring to the aches and pain that result from the constant gravitational pull on the spine, discs and muscle groups that you sustain during your workout.

The solid steel construction and secure single-action safety-lock makes our inversion boots safe and reliable. They are durable and sturdy and built to last! The boots are made comfortable by the contoured support pads that protect your ankles and legs. These boots can be used with an inversion table for complete spinal decompression and for a full-range of inversion stretching exercises.

Our gravity boots will put the saying – “no pain, no gain” to rest. These stress-reducing inversion boots will take the “pain” out of that myth while they enhance the gain!

Features:

- Solid steel frame
- Safety-lock
- Relieves back pain and stress
