

Digital TV Outdoor Antenna Aerial UHF VHF FM AUSTRALIAN Signal Amplifier Booster

RRP: \$74.95

Nothing is more frustrating than sitting down to watch your favourite TV program, only to lose the signal. This digital outdoor TV antenna from Randy & Travis Machinery solves that problem. Pulling in UHF, VHF, and FM Australian wavelengths, this aerial antenna amplifies the signal, boosting your reception even in the harshest of conditions.

Providing superb digital picture quality and stable performance for Australian DVB-T Digital TVs, this antenna gives you everything you need to enjoy all the programs and sports broadcasts you want to watch. Like to listen to FM radio? You can receive all the FM broadcasts you want—music, news, sports—whatever you like.

With its waterproof, UV-resistant construction, the digital antenna should provide you and your family with years of service. Not only that, but it can save you money over those years, as there's no need to invest in expensive cable or satellite TV services to enjoy a great picture.

Even if you're not a DIY person, the antenna is easy to install and easy to use. A user-friendly manual and a 10-metre coaxial cable give you everything you need for years of great TV and radio. Order yours today.
