

Natural Cork TPE Yoga Mat Sports Eco Friendly Exercise Fitness Gym Pilates

RRP: \$89.95

If you practice yoga or Pilates – or even do stretches before a strenuous workout, a breathable, absorbent yoga mat is a must. This durable yet eco-friendly cork mat from Randy & Travis Machinery allows your skin to breathe as you work out, absorbing sweat to give you a cool, comfortable surface no matter how long your session. Not only is cork breathable, but it is also antimicrobial. It works naturally to inhibit moulds, bacteria, and odours. Free from PVCs, TPEs, and other harmful chemicals. It's 100% natural, completely plant-based – and completely sustainable – with no trees chopped down to source the materials.

Thanks to the high-density natural rubber bottom layer, this mat grips the floor, giving you a stable surface to perform even the most difficult manoeuvres. Its 6-millimetre thickness cushions your body during your workout, allowing you to exercise in perfect comfort. Non-toxic markings define the space, allowing you to position yourself perfectly for each movement. It's waterproof and easy to care for. Simply clean it with a damp sponge and a little soap, rinse with some water, and let it air dry. Why use an uncomfortable, non-sustainable yoga mat when you can enjoy your workout with this all-natural one? Get yours today!
